The City of Portland is designing improvement for Division Street that includes curb bump-outs, green street vegetated stormwater facilities and other pedestrian safety improvements. In addition, the sewer line under Division will be replaced, and the street repaved.

We will hold an open house to give the community an opportunity to review designs being developed for Division Street. The design process is currently at 30%. This is an excellent time to see how the design is coming along and to talk with the design team.
